UNIVERSITY OF WOLVERHAMPTON

HERALD COLLEGE KATHMANDU

Introduction

- digital platform designed to serve as an in-depth resource for individuals seeking to explore or discover the captivating trekking trails and destinations within Nepal, while also providing essential trekking equipment.

- Provide Travel notice and information, destination details, and allow planning.

- Social interaction.

Aims and objective

Aims
- enhance the travel planning experience for tourists in Nepal

- empower travellers with essential resources for safe and informed trekking adventures.

Objective

- To reduce traveler isolation.

- To improve accessibility to heritage sites by integrating educational content and details for UNESCO-listed destinations.

ACADEMIC QUESTIONS

How can an integrated digital platform address split travel information, promote sustainable tourism practices, and foster community-driven engagement to enhance the travel planning experience in Nepal?

ARTEFACT

LITERATURE REVIEW

Project Title	Authors	Findings	Conclusion
Ecotourism related search for information over the internet: a technology acceptance model perspective	• Mohd sadiq • Mohd Adil	• Technology Adoption Trends • Users Behavioral Insights • Demographic Focus	• Design Priorities • Bridging the Intention-Behavior Gap
